Skills

Python
Rust
Linux
FastAPI
SQL
Docker
Jenkins
CI/CD
Git
PyTorch
AWS
Bash
GCP

Languages

Polish: Native
English: C1 - IELTS Academic 7.5 (2022)
German: A2

Certifications

AWS Cloud Foundations – AWS Academy
AWS Cloud Developing – AWS Academy
RAG and AI Agent Development – Intel & Poznan University of Technology

ADAM SAPIECHA

SOFTWARE ENGINEER

Work experience

Junior Automotive Software Engineer

April 2026
Present

Samsung R&D Institute

- Develop Python and Bash tools for Embedded Linux SoC platforms, diagnosing issues across software, operating systems and physical devices.
- Build Jenkins CI/CD workflows for device preparation, remote firmware flashing, automated testing and collection of results.
- Contribute backend APIs, result parsers and dashboards in a seven-person team, using FastAPI, PostgreSQL, React and Docker.

Fullstack Developer

August 2024
January 2026

Fundacja Sorno

- Independently designed and deployed an examination-results platform and Flutter app used by several thousand users across multiple schools.
- Built the Python/FastAPI backend and integrated GCP, Firebase, AWS email services and electronic payments, working directly with the client.
- Automated result processing, account creation and document delivery; maintained the platform and migrated data to the Medfile cloud.

QA Tester / Data Analyst

July 2025
April 2026

Tikrow

- Created test cases, tested REST APIs in Postman and checked backend data with SQL; investigated issues and verified fixes with developers.
- Automated repeatable data analyses in Python and adapted an AI model to assess chatbot conversations and identify problematic responses.
- Mapped business processes, prepared diagrams and technical documentation, and supported application releases in development and production.

Portfolio

adam-sapiecha.github.io/Portfolio-AdamSapiecha/

Education

BEng in Computer Science

September 2023
Present

Polish-Japanese Academy of Information Technology

Final year; degree in progress.

Selected projects

TaskMesh - Distributed Task Execution

Rust / PostgreSQL job engine with retries and crash recovery.

AI Posture Analysis System

RGB-D posture analysis prototype using OAK-D, AI and 3D geometry.

Flood-aware Evacuation Routing

FastAPI routing with OpenStreetMap and flood data to avoid flooded roads.

Dual-Agent Support System

Java / OpenAI support application with intent routing and specialized agents.

Data Processing Consent

I consent to the processing of the personal data provided in my application for the purpose of conducting the recruitment process for the position for which I am applying, in accordance with Regulation (EU) 2016/679 (GDPR).
